Kimber®
CUSTOM SHOP
What all guns should be™

Kimber offers nearly 200 purpose-built pistols and rifles to meet any need.

Kimber pistols, rifles and Less-Lethal products set the performance standard for the industry. Clockwise from left: Model 84L Mountain Ascent™ .270 Win., PepperBlaster® II, Solo® Sapphire™ 9mm, Rimfire Target Conversion Kit™ (silver) .22 LR and Desert Warrior® TFS .45 ACP.

MADE IN AMERICA

Unequaled Quality.

Even before the first Kimber® rifle was completed some 30 years ago, manufacturing firearms of unequaled quality was already the singular company goal. Do this, it was reasoned, and everything else will fall in line. On the strength of that commitment, Kimber has become the world's largest producer of 1911 pistols and the market leader in classic hunting rifles. Recent introductions of dynamic new platforms like Solo 9mm and Micro .380 ACP pistols, along with PepperBlaster less-lethal products, have established Kimber as an innovator as well; a position that will continue to solidify as new firearms and accessories are launched. Quality is the true measure of value. Whether it means accuracy or dependability, the beauty of a finish or the precise fit of wood to metal, quality is an integral part of every Kimber.

Unmatched Performance.

More law enforcement professionals, competition shooters and people who carry a firearm for personal protection choose Kimber than any other brand of 1911 pistol. Solo 9mm micro-compacts have been backordered since the day they were introduced and Micro .380 ACP pistols have been welcomed with similar demand. Hunters and shooters who refuse to compromise accuracy, dependability or elegance insist on Kimber rifles in increasing numbers. This has all happened for a single reason–Kimber pistols and rifles deliver unmatched performance. Meeting demand has fostered a continuing expansion that emphasizes quality, along with making improvements to both delivery and customer service. Today, Kimber stands as the symbol of quality American-made firearms. As it always has been, performance remains why Kimber is what all guns should be.

NEW PRODUCTS

The continuous expansion of models is a Kimber hallmark. Special finishes and custom features are welcomed by firearms owners who insist on the best and refuse to compromise. At Kimber, quality is everything, ensuring a lifetime of flawless service at peak performance.

Special Editions

The overwhelming popularity of the Sapphire Ultra II will continue with the Sapphire Pro II in 9mm, and the additions of the Onyx Ultra II in 9mm and .45 ACP. Unique custom finishes, accented by intricate engraving, draw attention to these one of a kind gem tone 1911s. See page 38.

Threaded for Suppression

Expanding the options for threaded barrels, we have added two full-sized models in the Desert Warrior TFS and the Warrior SOC TFS both with 5.5-inch barrels. In addition to our full-size selections we have included the Pro TLE II TFS which has a 4.5-inch barrel. All TFS models ship with a thread protector for use when a suppressor is not attached. See pages 14 and 18.

Micro Raptor Stainless

Our Micro .380 ACP provides unmatched quality in small concealed carry options. For 2015 we are providing the features and finishes of the ever popular Raptor family to our line of superior micro compact carry options. See page 46.

Solo

The Solo not only provides all metal construction, 9mm power, and a 2.7-inch barrel in 17 ounces; it also continues to provide the custom features and finishes that are expected from Kimber. The Solo Carry with Rosewood Grips and Solo Crimson Carry offer additional grip options; the Solo Sapphire offers the unique finishes and features found in our 1911 lines such as frame texturing and PVD slide finish of the Sapphire and Onyx. See page 48.

Adirondack & Tactical

Continuing as the industry leader in lightweight hunting rifles, we are adding the 300 AAC Blackout and 6.5 Creedmoor to the Adirondack. Tactical rifle options expand with the addition of 6.5 Creedmoor in the Advanced Tactical II and the Advanced Tactical SOC, while the Advanced Tactical SRC provides new barrel and stock features. See pages 58 and 64.

Eclipse & Custom Shop

The popular Eclipse family now ships with the highly effective Slatewood Crimson Trace Lasergrips sight system. The addition of Rosewood Crimson Trace Lasergrips on our RCP (Refined Carry Pistol) elevates this top seller to a new level of specialization. See pages 26 and 40.

1911 PISTOLS

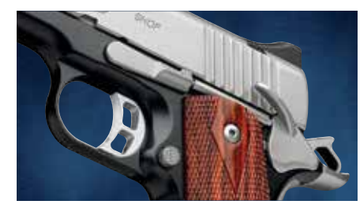
MADE IN AMERICA

Accuracy, dependability and meaningful features determine the true quality of a pistol. On the strength of quality, Kimber has become the world's largest producer of 1911 pistols. Compare a Kimber with any other brand of 1911 – or any other type of semi-automatic – and see why Kimber is the choice of America's best.

The Ultra CDP II (above) and Gold Match II (below) represent the full spectrum of the Kimber 1911 pistol selection. Designed for concealed carry, competition and tactical applications; nearly 100 purpose-built models are offered.

Like all Kimber centerfire 1911 pistols, the Ultra CDP II has a barrel machined from solid stainless steel to critical match grade dimensions. CDP pistols also have a Carry Melt treatment that rounds and blends edges so they will not snag.

Kimber 1911 chambers are cut to critical match grade dimensions so each pistol can realize its true accuracy potential. Ejection ports are lowered and flared so ejecting brass easily clears, avoiding jams.



With a pull weight of 4-5 pounds, Kimber match grade triggers break crisp and clean. There is no long take-up, heavy pull or overtravel common to other brands and semi-automatic designs. A smooth trigger pull increases both confidence and accuracy.

All Kimber pistols wear fixed, adjustable or night sight sets securely mounted in dovetails machined into the slide. Kimber sights are steel for maximum integrity and durability.

Kimber® builds the world's finest 1911 pistols right here in America. This is fitting, as few things are more American than a 1911 .45 ACP. Moreover, each critical component is manufactured inside the Kimber factories for the best reason of all – getting it right means doing it yourself. The finest raw materials form the foundation and Kimber does the rest, ensuring every part meets unequaled standards.

America's best shooters choose Kimber pistols. Legendary LAPD® SWAT tested five major brands and chose Kimber. United States Marines assigned to Special Operations Command chose Kimber. The U.S.A. Shooting Rapid Fire Pistol Team trains for Olympic and international competitions with a Kimber. They all chose Kimber for the same reasons: quality, dependability and accuracy. So should you.

Complete descriptions of Kimber 1911 pistols are presented throughout the following pages and a network of nearly 2,000 Kimber Master Dealers across America stand ready to assist in the selection of a model that meets any need. To locate the nearest Kimber Master Dealer, find information on new models or view product videos, please visit Kimber on Facebook or at kimberamerica.com.

The Team Match II features a stainless steel slide and frame with highly-polished flats, special markings and special grips. The slide is coated in an ultra-durable DLC finish as well. Available in .45 ACP and 9mm, details are on page 16.

SOLO

Solo 9mm pistols has ergonomics similar to that of a 1911 for comfortable and intuitive handling. With an aluminum frame and steel slide it is one of the smallest and most powerful pocket pistols available. Featuring ambidextrous safety and magazine release, properly dimensioned sights and smooth, consistent trigger pull. There is no compromise between size, accuracy and power.

Features

- Short 2.7-inch barrel for maximum concealability.
- Weighing just 17 ounces, Solos are among the smallest and lightest steel/aluminum guns in their class.
- 1911 ergonomics.
- Available in 9 models, all in 9mm.

MICRO

Micro .380 ACP pistols include many proven 1911 design elements that make them comfortable to carry, quick and safe to operate, and easy to shoot accurately. Weighing just 13.4 ounces and with a barrel length of only 2.75 inches, they are ideal for concealed carry. Mild .380 ACP recoil, smooth single-action trigger pull and well-designed sights make them a pleasure to shoot. They are also a perfect fit for anyone with small hands.

Features

- Short 2.75-inch barrel and thin profile ensures concealability.
- Weighing just 13.4 ounces, Micro pistols are easy to carry.
- Smaller grip dimensions improve fit for small hands.
- Available in 5 models, all in .380 ACP.

COMPACT

Compact models blend the short grip of the Ultra with the longer 4-inch barrel of Pro models, the reverse of the Ultra+ configuration. The longer barrel increases the distance between the sights for more consistent aiming. It also gives an increase in velocity, and additional weight improves balance and reduces felt recoil. Compact models are ideal for shooters with smaller hands and work well for concealed carry or home defense.

Features

- Barrel is 4 inches long for better balance and extra velocity.
- Short grip for easier carry and concealment.
- Lighter weight for more comfortable carry.
- Available in 1 model in .45 ACP.

ULTRA

With a 3-inch bull barrel and a short grip, Ultra models are easy to conceal and comfortable to carry. Most frames are made from aluminum rather than steel to reduce weight. While light pistols do have a slight increase in felt recoil, this is minimized by Kimber's recoil system and unequaled 1911 ergonomics. Ultra pistols are the smallest and lightest 1911 pistols offered today, but Kimber quality ensures this does not compromise either dependability or accuracy.

Features

- Barrel is just 3 inches long for easiest concealment.
- Short grip for concealability and comfortable carry.
- Most Ultra models weigh just 25 ounces.
- Available in 21 models and 2 calibers.

ULTRA+

The Ultra+ combines the 3-inch barrel and light weight of Ultra models with a full-length grip for improved recoil control. They are a better fit for shooters with large hands and accept full-length magazines with additional capacity. Weighing just 27 ounces, 2 ounces more than an Ultra, the increased control provided by the full-length grip is a significant advantage for many shooters, improving accuracy and reducing time between shots.

Features

- Barrel is just 3 inches long for easiest concealment.
- Full-length grip fits shooters with larger hands.
- Weighing just 27 ounces, Ultra+ pistols are easy to carry.
- Available in 2 models, both in .45 ACP.

PRO

Combining a 4-inch barrel with a full-length grip, Pro models may be the best all-around 1911 configuration. One is certain to be an ideal choice for concealed carry, personal defense or general use. Some have lightweight aluminum frames while others have heavier steel frames. Two even have the Kimber Tactical Rail™ for mounting lights and accessories. All have a near-perfect balance that makes shooting them easy, accurate and fun.

Features

- Barrel is 4 inches long to optimize balance and concealability.
- Full-length grip fits shooters with larger hands.
- Frame options permit a model selection that meets any need.
- Available in 24 models and 3 calibers.

CUSTOM

With a 5-inch barrel and full-length grip, Custom* models are full-size 1911 pistols. The most popular configuration, they are favored by law enforcement professionals and competition shooters. Slightly heavier and with a greater distance between sights, they are easier to shoot accurately and have reduced felt recoil. The slim profile and outstanding 1911 ergonomics make them ideal for duty, personal defense and general use.

Features

- Full-length grip fits shooters with larger hands.
- Barrel is 5 inches long for optimal velocity and accuracy.
- Wide selection of models for any application.
- Available in 44 models and 5 calibers.

*"Custom" is not always part of full-size pistol names.

1911 PISTOLS | Custom, Pro & Ultra II

The Royal II .45 ACP wears bone grips and a charcoal blue finish from Turnbull Restoration.

The accuracy, absolute dependability and features of this Kimber family sets the standard against which all other 1911 brands and models are compared. Their legendary performance has made Kimber the world's largest producer of 1911 pistols. A Kimber 1911 is a perfect choice for concealed carry, personal defense or competition.

The Kimber Custom, Pro Carry and Ultra Carry II family has no-nonsense standard features that promote intuitive operation and absolute dependability: lowered and flared ejection ports, machined dovetail mounted three dot or tritium night sights, and rounded and blended edges for comfortable carry. All models have a Kimber Firing Pin Safety, designated by "II" in the model name, provides an extra margin of confidence. The Custom size is constructed with all steel or stainless steel and a variety of sight and finish options. While the Pro and Ultra sizes have the same slide construction as the Custom, most of the frames are constructed with lightweight aluminum frames; combine this with the slim nature of the 1911 and you have the ultimate in carry and concealability.

Kimber 1911 slides and frames are paired early in production and travel through the factory together, ensuring optimal fitting of every part. This is one of many reasons Kimber pistols deliver unequaled performance and dependability.

Features

- Kimber match grade barrels are machined from a single piece of solid stainless steel, ensuring accuracy and long life.*
- Kimber 1911 pistols feature a beveled magazine well for quick and positive loading.
- An enlarged firing pin stop locks the extractor in position for absolute reliability.
- The magazine release button is checkered for fast and positive operation.
- All Kimber 1911 pistols feature a polished breech face for flawless feeding and extraction.

1911 PISTOLS | Custom TLE II

The Custom TLE/RL II (TFS) is the first Kimber pistol with a barrel threaded for suppression. It is available in both .45 ACP and 9mm.

Pistols designed for law enforcement and home defense benefit from meaningful features that enhance performance. Kimber Custom TLE II pistols are available in a selection of calibers and configurations that meet almost any requirement. Models with the Kimber Tactical Rail™ accept a variety of lights and sights, and some are also threaded for suppression.

Custom TLE models are professional tools created in cooperation with law enforcement and military experts who required a Kimber Custom II with enhanced features. A TLE (Tactical Law Enforcement) is widely regarded as the ideal 1911 for duty carry, tactical applications and personal protection. Both steel and stainless steel models are offered. All have night sights to ensure low-light performance and 30 lines-per-inch front strap checkering for a positive grip even with cold, wet or gloved hands. Some also have the Kimber Tactical Rail for accessory attachment and two models have extended barrels that are threaded for suppression. Chambered in .45 ACP, as well as 9mm and 10mm, these combinations are unbeatable for duty and home defense.

Custom TLE pistols feature 3-dot (green) night sights for enhanced performance in low light conditions. The front dot is brighter to encourage immediate focus on the front sight and beyond.

Two TLE models with a threaded barrel are available. Chambered in .45 ACP and 9mm, and with the option of the Kimber Tactical Rail, TFS (Threaded for Suppression) pistols include a thread protector cap.

All Custom TLE pistols feature 30 lines-per-inch front strap checkering for a positive grip and greater control regardless of moisture or environmental conditions. Frames are carefully machined from the finest steel or stainless steel.

1911 PISTOLS | Pro & Ultra TLE II

The Stainless Pro TLE II (LG) .45 ACP is perfect for duty, concealed carry and personal defense.

Reduced barrel or barrel and frame size combined with specialized features for duty, concealed carry and home defense are the hallmark of Pro TLE and Ultra TLE pistols. Standard feature of front strap checkering and tritium night sights, combined with optional laser grips, rails, finishes and a barrel threaded for suppression provide an option for any application.

Nowhere is dependability more critical than in a carry pistol; Kimber Pro TLE and Ultra TLE take quality and performance to the next level. Chambered in .45 ACP or 9mm, a Kimber Pro size pistol is an ideal combination of size, weight and power. The Tacoma, Washington P.D. extensively tested the Pro models and found them to be the single most dependable firearm they had put through the paces in 20 years. Ultra Carry lightweight aluminum frames are created on the same state of the art machines and to the same exact tolerances as full-size steel frames. When you carry a Kimber, you carry with absolute confidence.

Pro and Ultra pistols have 4- and 3-inch stainless steel bushingless match grade bull barrels fitted directly to the slide. Chambers and triggers are also match grade. Shorter barrels make them easier to conceal and more comfortable to carry.

RL models have an integral Picatinny rail for accessory attachment. Along with TLE and other designated models, they also feature 3-dot (green) night sights which greatly enhance low-light performance.

All Kimber 1911 pistols have beveled slide serrations that will not snag clothing or holsters. Serrations are deep and wide to ensure a positive grip; even with cold, wet or gloved hands.

The Gold Match II .45 ACP is extremely accurate and tuned for absolute dependability.

Kimber Gold Match II, Stainless Gold Match II and Team Match II pistols deliver a standard of performance unequaled by any other brand or model of production 1911. In truth, they best many full-custom pistols as well. Designed for competition, their accuracy and dependability have made them a favorite for all-around use.

Gold Match models have a stainless steel match grade barrel that is fitted by hand in the Kimber Custom Shop™ for exceptional accuracy. They look as good as they shoot, with flat surfaces polished to a high shine contrasting satin over the curves. Features include ambidextrous thumb safety, adjustable sight, match grade Premium Aluminum Trigger™ and elegant rosewood grips. The Team Match II is a special version created for the U.S.A. Shooting Rapid Fire Pistol Team to use in action shooting competitions at the national and international level. It wears a tough black DLC coating on the slide, along with special G-10 grips. All three models are chambered in .45 ACP and two are offered in 9mm.

All Kimber 1911 pistols feature a beveled magazine well that aids fast reloading by guiding the magazine into the frame. Elegant hex-head screws offer the perfect complement to premium Kimber grips.

Gold Match and Team Match II pistols have an extended ambidextrous thumb safety, target sight with steel-on-steel click adjustments that lock in accuracy and a high ride beavertail grip safety that aids control during rapid fire.

The Team Match II was created in cooperation with the U.S.A. Shooting Rapid Fire Pistol Team to train for the Olympics. Kimber is the largest donor of any firearm-manufacturing company in Team history, contributing over $1 million to date.

The Warrior SOC .45 ACP is a full-size 1911 built for absolute dependability under even the most adverse conditions.

Warrior models are highly refined tactical pistols loaded with features that enhance real-world performance. Nothing is here just for show. The Kimber Tactical Rail permits quick and secure mounting of accessories, Tactical Wedge night sights ensure low-light performance and G-10 grips have a deep texture that grabs and holds even with cold, wet or gloved hands. Standard features include a tough KimPro II self-lubricating finish, ambidextrous thumb safety and a lanyard ring for additional retention options. The Warrior has a matte black finish, the Desert Warrior is Desert Tan and the Warrior SOC (Special Operations Capable) has a tan/green finish plus a Crimson Trace Rail Master laser sight. Two models are offered with the TFS barrels, and each Warrior is chambered in the unequaled .45 ACP.

Warrior pistols are the full realization of the 1911 as a tool of military and law enforcement. Designed without compromise and machined from the finest materials, each model is outfitted with the critical features demanded by hard-use tactical environments. These same features make a Warrior a perfect choice for personal protection or home defense.

KimPro II finish offers outstanding resistance to chemicals, moisture, salt and UV light. Warrior models have Kimber G-10 grips, ambidextrous thumb safety, lanyard ring, bumped and grooved beavertail grip safety and a short (military-length) guide rod for enhanced control and absolute dependability in harsh conditions.

The Warrior SOC includes a Crimson Trace Rail Master laser sight. Additional features include a tan/green KimPro II finish and special G-10 grips with an aggressive texture that ensures control regardless of conditions.

Desert Warrior and Warrior SOC are available with 5.5-inch barrels threaded for suppression (TFS). TFS models ship with a thread protector cap.

Crimson Carry II

The lightweight Ultra Crimson Carry II .45 ACP is perfect for all-day-every-day concealed carry.

Crimson Carry .45 ACP pistols have a lightweight aluminum frame for easier carry. Each is fitted with Crimson Trace Lasergrips that project a bright red or green dot visible in virtually any light, a significant psychological and tactical advantage that also increases both speed and accuracy under stress. They are ideal for personal defense.

Having confidence in a carry pistol is critical. Dependability and accuracy proven through practice increases confidence. Crimson Trace Lasergrips project a bright red or green dot downrange, an important aid in training. Reading the dot illustrates the advantage of proper grip and trigger control which improves accuracy and reduces time between shots for any level of shooter. Crimson Carry models incorporate Crimson Trace Lasergrips, the finest laser sight available today. Combining that advantage with Kimber quality and dependability make Crimson Carry pistols an unbeatable value. Offered in three sizes, they are ideal for duty or concealed carry, as well as home defense.

Crimson Carry pistols include Crimson Trace Lasergrips in an exclusive rosewood finish with classic 1911 double-diamond checkering and the Kimber logo. Lasergrips promote faster target acquisition and are a tremendous aid in training.

Custom features include a recessed slide stop pin and elegant 2-tone non-reflective finish. Crimson Carry frames are machined from solid bricks of premium aluminum which reduces weight for easier carry. Match grade triggers break crisp and clean.

Attention to little details makes a big difference in performance. Kimber 1911 pistols are enhanced with features like an extended thumb safety with deep serrations for positive manipulation and rounded Commander-style hammers that will not cut or snag. Barrels are stainless steel.

Ultra Crimson Carry II
Short grip and 3-inch barrel

Pro Crimson Carry II
Full-length grip and 4-inch barrel

Custom Crimson Carry II
Full-length grip and 5-inch barrel

Crimson Carry pistols featuring Crimson Trace Lasergrips with a green beam are now available .

Features

- All Crimson Carry models include Crimson Trace Lasergrips with exclusive rosewood finish and Kimber logo, a $369 value when purchased separately.
- The beam from Crimson Trace Lasergrips is activated by a pressure pad located just below the trigger guard at the front of the grip. Two #2032 lithium batteries have two hours (green beam) and four hours (red beam) of run time.
- The Custom Crimson Carry II has a 5-inch match grade barrel and match grade barrel bushing.
- The Pro Crimson Carry II and Ultra Crimson Carry II have bushingless match grade bull barrels fitted directly to the slide.

The Master Carry Pro .45 ACP is light weight and has a Round Heel Frame for comfortable carry.

The Master Carry family of .45 ACP pistols combine Kimber performance and popular concealed-carry features into an extraordinary package. Tactical Wedge night sights, Round Heel Frame with serrated mainspring housing and new Crimson Trace Master Series Lasergrips are all standard. One is sure to meet any need.

The Master Carry Custom is a full-size pistol with a stainless steel frame, slide and barrel. Like all Master Carry models it also has a recessed slide stop pin, black KimPro II finish on the slide for additional resistance to the elements and rounded edges that will not snag clothing or holsters. The Master Carry Pro features a 4-inch bull barrel and lightweight aluminum frame. It is easier to conceal and carry, and has near-perfect balance. The Master Carry Ultra has a 3-inch barrel and short grip. Weighing just 25 ounces, it is one of the finest Kimber pistols ever offered for full-time concealed carry. Each model includes special Crimson Trace Master Series Lasergrips.

Crimson Trace Master Series Lasergrips project a red dot that speeds aiming regardless of light conditions. Lasers are an invaluable training tool, quickly illustrating proper grip and trigger control. Custom features include a recessed slide stop pin.

Master Carry pistols have a Round Heel Frame that makes them easier to conceal and more comfortable to carry. The serrated mainspring housing contributes to a secure grip and speeds sight picture recovery between shots.

Tactical Wedge night sights combine with Crimson Trace Lasergrips to maximize low-light performance. Like all Kimber pistols, sights on Master Carry models are securely mounted in machined dovetails for strength.

Master Carry Ultra
Aluminum frame, short grip and 3-inch barrel

Master Carry Pro
Aluminum frame, full-length grip and 4-inch barrel

Master Carry Custom
Stainless steel frame and 5-inch barrel

Features

- All Master Carry models include Crimson Trace Master Series Lasergrips.
- The beam from Crimson Trace Lasergrips is activated by a pressure pad located just below the trigger guard at the front of the grip.
- Two #2032 lithium batteries have four hours run (laser activated) time.
- The Master Carry Custom has a stainless steel frame. Other models have lightweight aluminum frames. All have stainless steel slides and barrels.
- A Round Heel Frame aids concealability and promotes comfortable carry. The KimPro II slide finish provides additional resistance to moisture.

The Tactical Entry II .45 ACP with the Kimber Tactical Rail is purpose-built for duty and home defense.

Tactical models have all the performance-enhancing features demanded by law enforcement professionals and cover every application from concealed carry to tactical response. Frames wear KimPro II, a premium finish that is self-lubricating and extremely resistant to moisture. All are chambered in .45 ACP and the Tactical Pro II is also available in 9mm.

Checkering on the front strap and under the trigger guard, night sights, extended ambidextrous thumb safety and beveled magazine well are among the no-nonsense features on every Tactical. Here, performance and dependability is what counts. One of three full-size versions will meet any criteria, and two no-compromise smaller models are offered when easier carry or concealment becomes a priority. All have rounded and blended edges that will not snag clothing or hang up on a holster. Accuracy is ensured by a match grade barrel, chamber and trigger. No pistol equals a 1911 for defense or tactical applications, and no 1911 brand equals a Kimber.

The Tactical Ultra II, Tactical Pro II and Tactical Custom II have lightweight aluminum frames. The Tactical Custom HD II and Tactical Entry II have stainless steel frames, and the Tactical Entry II also has the Kimber Tactical Rail™. All have stainless steel barrels.

Tactical pistols feature the Premium Aluminum Trigger™ from the Kimber Custom Shop that breaks crisp at 4-5 pounds without creep or overtravel. Both front strap and trigger guard belly have 30 lines-per-inch checkering for a positive grip.

Tactical models include custom features like an extended and beveled magazine well for fast reloading plus ambidextrous thumb safety. Slides and small parts are finished in matte black to complement the charcoal gray KimPro® II on the frames.

Tactical Ultra II
Short grip, aluminum frame, night sights, 3-inch barrel

Tactical Pro II
Full-length grip, aluminum frame, night sights, 4-inch barrel

Tactical Custom II
Features of the Tactical Pro II plus 5-inch barrel

A complete presentation of specifications and features begins on page 66.

The Eclipse Ultra II (LG) offers a rugged stainless steel frame and slatewood lasergrips combined with the Eclipse finish.

Kimber Eclipse pistols have a brush-polished finish over a stainless steel slide and frame. The matte black small parts provide an appropriate finishing touch. Custom Shop additions include 30 lines-per-inch checkering on the front strap and a Premium Aluminum Trigger breaks at 4-5 pounds to ensure accuracy.

While the Eclipse finish is striking, performance is what matters. Match grade barrels, chambers and triggers deliver the unequaled accuracy that made Kimber the world's most popular 1911. All models are chambered in .45 ACP and the Eclipse Custom II is also offered in 10mm. Breech faces are polished for dependable feeding. Both the slide release lever and magazine release button are textured for fast, positive operation. Their barrels are machined from solid stainless steel. The Eclipse Ultra II (LG) is special in another respect, it is one of two 3-inch Kimber 1911 pistols with a stainless steel frame. Three Eclipse models are now available with Slatewood Crimson Trace Lasergrips. Performance has never looked this good.

All Eclipse models are equipped with tritium night sights with an all-steel frame and slide construction. New to the family are three models featuring Slatewood lasergrips.

All Kimber pistols have beveled slide serrations that will not snag. The brush-polished Eclipse finish combines with matte black small parts to create a stunning appearance. The stainless steel slide, frame and barrel provide additional resistance to the elements.

Eclipse pistols have 30 lines-per-inch front strap checkering for a positive grip even with cold, wet or gloved hands. Laminated gray/black grip panels are checkered in the traditional 1911 double diamond pattern and complement the finish.

Eclipse Ultra II (LG)
Stainless steel slide and frame, short grip, 3-inch barrel, with Slatewood Crimson Trace Lasergrips

Eclipse Pro II (LG)
Stainless steel slide and frame, full-length grip, 4-inch barrel, with Slatewood Crimson Trace Lasergrips

Eclipse Custom II (LG)
Stainless steel slide and frame, full-length grip, 5-inch barrel, with Slatewood Crimson Trace Lasergrips

Eclipse Custom II
Same frame and barrel features as Eclipse Custom II (LG) with laminated wood grips chambered in 10mm

Eclipse Target II
Features of the Eclipse Custom II 10mm plus adjustable night sight

Features

- The Eclipse Target II has an adjustable bar/dot night sight system.
- Eclipse II (LG) models and Eclipse Custom II 10mm have fixed 3-dot (green) tritium night sights.
- Models with 5-inch barrels have stainless steel match grade barrel bushings. Other models have bushingless match grade bull barrels.
- The Eclipse Ultra II (LG) and the Eclipse Custom II 10mm have ramped match grade barrels.

Crimson Trace Lasergrips and night sights make the Ultra Covert II .45 ACP ideal for concealed carry.

With a lightweight aluminum frame, Crimson Trace Lasergrips and Tactical Wedge night sights, Covert models are specifically designed for concealed carry by the Kimber Custom Shop. These twin sight systems ensure that if you can see, you can aim – regardless of light conditions. Beyond that, Kimber quality ensures unequaled accuracy and absolute dependability.

Covert .45 ACP pistols are the perfect combination of lightweight and meaningful tactical features. The 30 lines-per-inch front strap checkering pattern with bordered base guarantees a positive grip even with cold, wet or gloved hands. The Carry Melt™ treatment carefully rounds and blends all edges so they will not snag on clothing or holsters. A bumped and grooved beavertail grip safety promotes control under stress. Accuracy is assured by the match grade barrel, chamber and trigger. Three sizes are offered, covering everything from duty to concealed carry and backup. Carry a Kimber Covert, and don't be afraid of the dark.

Covert frames wear Desert Tan KimPro II, a custom finish that is self-lubricating, durable and resistant to both moisture and salt. Slide and small parts are finished in matte black, complementing the frame and giving these pistols a dynamic appearance.

Tactical Wedge night sights, 30 lines-per-inch front strap checkering with bordered base and beavertail grip safety are standard on all Covert models. Both the Custom Covert II and Pro Covert II have a lanyard ring and magazine with extended bumper pad.

Covert pistols are fit and finished by hand in the Kimber Custom Shop for exceptional performance and dependability. Crimson Trace Lasergrips with digital camouflage pattern and Kimber logo offer several critical training and tactical advantages.

Ultra Covert II
Short grip, 3-inch barrel

Pro Covert II
Full-length grip, 4-inch barrel, lanyard ring

Custom Covert II
Features of the Pro Covert II plus 5-inch barrel

Features

- Frames are machined from solid bricks of 7075-T7 aluminum, a material which has been extensively tested and proven.
- Tactical Wedge 3-dot (green) night sights and digital camouflage Crimson Trace Lasergrips ensure low light performance.
- Covert frames have 30 lines-per-inch checkering with bordered base on the front strap for a positive grip.
- Custom Covert II and Pro Covert II have a lanyard ring and magazine with extended bumper.

The Pro Aegis II 9mm has specialized features for concealed carry and shooters with smaller hands.

Shooters with small hands are often forced to carry a revolver for self-defense because the grip of a semi-automatic is too large. The Aegis 9mm is built in the Kimber Custom Shop to fit small hands. Beyond a perfect fit, Aegis models have the natural pointability, reduced recoil, crisp trigger pull, safety and accuracy of a Kimber 1911.

Small, light and dependable pistols get carried. Those too bulky for the proper grip that ensures accuracy and makes shooting fun get left at home. Aegis pistols feature thin rosewood grips, altered controls and rounded edges that make them easy to shoot. A great single-stage trigger that breaks clean at 4-5 pounds makes them easy to shoot accurately. Custom features include Tactical Wedge night sights, flat top slide, 30 lines-per-inch checkering on the front strap and a premium KimPro II finish that is self-lubricating and extremely resistant to moisture. With a Kimber Aegis, compromise is a thing of the past.

Aegis pistols have thin ball-milled rosewood grips, 30 lines-per-inch front strap checkering and a high cut under the trigger guard. These features allow shooters with small hands to get a proper grip and maintain control under recoil.

A smooth magazine release button, wide serrations and bobbed thumb safety are some of the Custom Shop additions that make Aegis pistols ideal for true concealed and backup carry.

Tactical Wedge 3-dot (green) night sights transition perfectly into the flat top slide. Ramped stainless steel match grade barrels and solid triggers are standard. Lightweight aluminum frames make Aegis pistols easy to carry.

Ultra Aegis II
Short grip and 3-inch bull barrel

Pro Aegis II
Full-length grip and 4-inch bull barrel

Custom Aegis II
Full-length grip and 5-inch barrel

Features

- Flat top slide, bobbed thumb safety, bumped and grooved grip safety and front strap checkering are standard.
- Aegis frames are machined from solid bricks of 7075-T7 aluminum, a material which has been extensively tested and proven.
- Made in the Kimber Custom Shop, Aegis pistols have a Service Melt™ treatment that rounds and blends edges so they will not snag clothing.
- Tactical Wedge 3-dot (green) night sights are dovetail-mounted to ensure integrity.
- Ramped barrels are machined from solid stainless steel to critical match grade dimensions for unequaled accuracy.

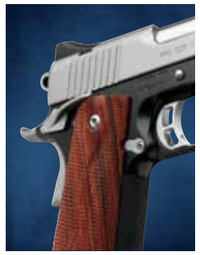
The Custom CDP II .45 ACP from the Kimber Custom Shop delivers uncompromising features and performance.

From the Kimber Custom Shop, CDP (Custom Defense Package) pistols combine all the best carry features into a package that gives them their name. Adding these features as they are produced reduces their price by over $500, making them an incredible value. CDP pistols have no equal for carry and defense, just what you expect from Kimber.

CDP pistols have it all. Up top are night sights dovetail-mounted on a stainless steel slide. The lightweight aluminum frame has 30 lines-per-inch checkering on the front strap and trigger guard belly. The frame also wears a KimPro II finish that is self-lubricating and resistant to moisture and salt. Like all Kimber 1911s, CDP pistols have a match grade barrel, chamber and trigger for unequaled accuracy. The Carry Melt treatment rounds and blends edges so they will not print or hang up on clothing. Six versions are offered – all of them just right for any concealed carry or personal defense application.



CDP pistols have 30 lines-per-inch checkering on the front strap and under the trigger guard for a positive grip, even with wet or cold hands. Features include ambidextrous thumb safety and Premium Aluminum Trigger that breaks at 4-5 pounds.

Made entirely in the Kimber Custom Shop, CDP pistols have low-profile 3-dot (green) night sights along with a Carry Bevel treatment that rounds and blends edges so they cannot snag clothing or holsters.

CDP models are chambered in .45 ACP, what many consider the finest cartridge ever developed for law enforcement as well as personal defense. The Ultra CDP II is also available in 9mm.

The Stainless Raptor II .45 ACP is a dynamic showcase of Kimber Custom Shop features.

Crafted in the Kimber Custom Shop, Raptor pistols take their name from a combination of aggressive slide and frame serrations, feathered logo grips and special finish accents. The design theme is unique while the features, dependability and accuracy are pure Kimber – unequaled by any other brand of 1911.

Raptor pistols are offered in a wide variety of sizes and finishes, each loaded with Custom Shop features that enhance performance. Night sights, ambidextrous thumb safety, bumped and grooved grip safety and a match grade stainless steel barrel are standard. Ultra models have 3-inch bull barrels and aluminum frames that make them easy and comfortable to carry. Others are available in either steel or stainless steel, making them ideal for everything from duty to home defense and competition. The quality of Kimber Custom Shop pistols is on par with that of America's finest pistolsmiths. Pick up a Raptor and see for yourself.

Raptor pistols are chambered in .45 ACP. Custom Shop features include an ambidextrous thumb safety, scaled slide serrations and Tactical Wedge night sights. The Grand Raptor II has an adjustable bar/dot night sight system.

All Raptor pistols have a flat top slide with a back-cut feathered row of scales running the full length. Made in the Kimber Custom Shop, they also incorporate standard features like match grade barrel, chamber and trigger.

Unique grips with a bordered scale pattern complete the design theme (Patent D560750S). Grand Raptor II grips (pictured) are rosewood, while other models have zebrawood grips. All Raptor models have scale-textured front straps for a positive grip.

Ultra Raptor II
Aluminum frame, short grip, 3-inch bull barrel

Stainless Ultra Raptor II
Aluminum frame, short grip, stainless steel slide, 3-inch bull barrel

Pro Raptor II
Steel frame, full-length grip, 4-inch barrel.

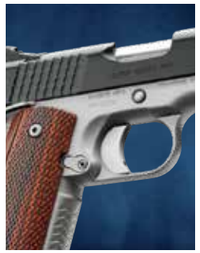
The Super Carry Pro .45 ACP takes features, function and elegance to the extreme.

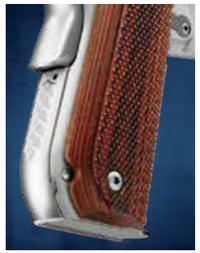
Super Carry .45 ACP pistols establish a new standard for concealed carry and personal defense. Built entirely by the Kimber Custom Shop; no aspect of usability, dependability or performance was overlooked. Fast, accurate and powerful, they include all the important features as well. There is no better pistol to have on your side.

The Super Carry family was designed with a single purpose, to be the finest concealed carry pistols ever offered. Two distinct versions are available. Super Carry models have a lightweight aluminum frame while Super Carry HD (Heavy Duty) models have a stainless steel frame. All have specialized features like night sights with cocking shoulder, directionally-engaging slide serrations for positive operation and a Round Heel Frame for snag-free and comfortable carry. Barrels, chambers and triggers machined to match grade dimensions ensure accuracy, while the self-lubricating KimPro II finish provides tremendous resistance to wear and the elements. For those who insist on the best, this is it.

Super Carry pistols have highly refined features like night sights with cocking shoulder, Carry Melt treatment for rounded and blended edges that will not cut or snag and directionally-engaging slide serrations for positive operation.



Custom Shop enhancements include a recessed slide stop pin with surrounding bevel plus a high cut under the trigger guard and aggressive front strap serrations for superior grip position and control under recoil.



A Round Heel Frame makes Super Carry pistols easier to conceal and more comfortable to carry. Serrated mainspring housing welds grip to palm, ensuring fast sight picture recovery between shots.

Super Carry Ultra
Aluminum frame, short grip, 3-inch barrel

Super Carry Ultra HD
Stainless steel frame and slide with KimPro II finish and 3-inch barrel.

The Super Match II .45 ACP is the finest all-around Kimber 1911 available today.

Gold Combat models are superlative in every respect, from features to accuracy and dependability. The Super Match II is the finest all-around Kimber ever offered, the Classic Carry Pro quite possibly the most elegant and the Ultra RCP II (LG) is unequaled for carry. All are from the Kimber Custom Shop.

The Super Match II .45 ACP is designed for competition but most are carried for personal protection by those who appreciate their features and exceptional accuracy. Each is guaranteed to have fired a 5-shot, 25-yard group measuring 1 inch or less center-to-center. The Classic Carry Pro .45 ACP is a traditional 1911 wearing bone grips and rich charcoal blue finish from Turnbull Restoration. The Ultra RCP II (LG) .45 ACP is highly specialized for concealed or backup carry and offers several unique features not found on any other small 1911. Collectively, these are the finest custom pistols available today.

Gold Combat pistols have herringbone-pattern Micarta grips, 24 lines-per-inch front strap checkering with bordered base and a high cut under the trigger guard that improves control during rapid fire.

Flat top slides, fine cocking serrations and night sights with cocking shoulder for one-hand cycling are unique Gold Combat features. Scalloped French shoulders elegantly blend slide to frame.

Gold Combat pistols have a 5-inch stainless steel bushingless match grade bull barrel with a deep crown that protects muzzle rifling. The Gold Combat RL II also has the Kimber Tactical Rail for quick accessory attachment.

Ultra RCP II (LG)
Aluminum frame, short grip, trough sight, bobbed controls, 3-inch barrel, rosewood Crimson Trace Lasergrip

Classic Carry Pro
Steel frame, full-length grip with bone panels, charcoal blue, 4-inch barrel

Gold Combat RL II
Features of the Gold Combat II plus Kimber Tactical Rail

Gold Combat II
Stainless steel frame and slide, night sights, KimPro II finish, 5-inch barrel

Gold Combat Stainless II
Features of the Gold Combat II with satin silver finish

Super Match II
Stainless steel slide and frame, KimPro II finish, accuracy guarantee

Features

- The Ultra RCP II (LG) (Refined Carry Pistol) features a trough sight, Round Heel Frame and Carry Melt for a smooth profile that will not snag.
- The Classic Carry Pro has a stunning charcoal blue finish from Turnbull Restoration, along with Round Heel Frame and bone grip panels.
- Gold Combat models have night sights with a cocking shoulder that permits cycling with one hand. They are also the only Kimber 1911 pistols with a 5-inch bushingless bull barrel.
- The Super Match II has an adjustable sight, along with a stainless steel match grade barrel, chamber and trigger. It also includes an accuracy guarantee.

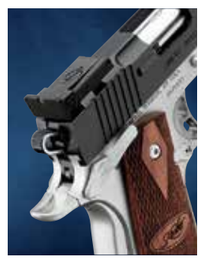
A complete presentation of specifications and features begins on page 66.

Rimfire pistols and conversion kits are chambered in .22 LR. They are exceptional training tools and great for recreational shooting.

Shooting a 1911 chambered in .22 LR is an effective and economical way to teach new shooters and enhance the training of others, regardless of their level of experience. Rimfire pistols are competitively priced with other semi-automatics and a rimfire conversion kit will pay for itself after only a few hundred rounds.

Rimfire pistols have the same features and unequaled performance as centerfire 1911s. Adjustable sight, beavertail grip safety and extended thumb safety are standard. Aluminum slides and frames make both rimfire pistols and conversion kits light – ideal for younger or inexperienced shooters. Rimfire Target Conversion Kits fit Kimber and most other brands of Mil-Spec 1911 pistols with a 4- or 5-inch barrel. New Rimfire Compact Conversion Kits fit Kimber and most other brands of Mil-Spec 1911 pistols with a 3 or 4-inch barrel. Conversion kits may be purchased directly from Kimber as they are not classified as a firearm. Contact Kimber Customer Information at (888) 243-4522 for additional fit information.



Rimfire pistols and Rimfire Target Conversion Kits have adjustable dovetail-mounted sights with responsive steel-on-steel click adjustments. Additional accuracy-enhancing features include match grade barrel and chamber. Rimfire Compact Conversion Kits have fixed sights.

Each Rimfire Super .22 LR is guaranteed to have fired a 5-shot, 25-yard group measuring 1.5 inches or less. Actual test targets are packaged with each pistol. All rimfire pistols and conversions include a 10-round magazine.

Built in the Kimber Custom Shop, Rimfire Super pistols have checkering on the front strap and under the trigger guard, rosewood logo grips, Premium Aluminum Trigger, ambidextrous thumb safety and a serrated flat top slide with bold flutes.

Rimfire Target
Aluminum frame and slide, matte black, adjustable sight

Rimfire Target
Aluminum frame and slide, satin silver, adjustable sight

Rimfire Super
Scalloped flat top slide, front strap checkering, accuracy guarantee

Rimfire Target Conversion Kit
Adjustable sight, fits 4- or 5-inch 1911

Rimfire Compact Conversion Kit
Fixed sight, fits 3- or 4-inch 1911

Features

- Rimfire pistols and conversion kits are designed to operate with high velocity .22 LR ammunition.
- Rimfire Target Conversion Kits fit any Kimber and most Mil-Spec 1911s with a 4- or 5-inch barrel. Rimfire Compact Conversion Kits fit any Kimber and most Mil-Spec 1911s with a 3- or 4-inch barrel. Installation is simple and takes less than 2 minutes.
- Conversions include an upper assembly and 10-round magazine. Compact kits include a spacer that blends the magazine into short-gripped pistols. A flush-fitting 8-round magazine is also offered.
- Unlike all other Kimber 1911s, rimfire pistols and conversion kits do not lock open after the last round is fired.

MICRO PISTOLS

MADE IN AMERICA

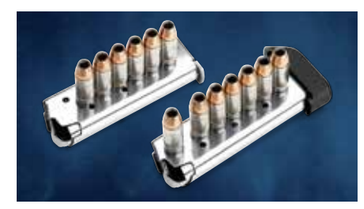
Micro .380 ACP pistols bring an unequaled level of safety, dependability and performance to concealed carry. Small and light, they blend Kimber quality with superior 1911 ergonomics and simple operation. Mild .380 ACP recoil and a smooth single-action trigger pull make them a pleasure to shoot, even for those with small hands.

The Micro CDP (below) and Micro CDP (LG) pistols from the Kimber Custom Shop combine proven 1911 features and .380 ACP performance in a tiny package. Each weighs just 13.4 ounces.

Micro pistols weigh less than 14 ounces. Light weight combined with the short 2.75-inch barrel make them a pleasure to carry and easy to conceal.

All Micro pistols have a stainless steel barrel for additional resistance to moisture. Steel sights are mounted in dovetails machined into the slide for superior strength.

Standard features include a checkered slide release lever and magazine release button plus a serrated thumb safety for smooth, positive operation.



A 6-round flush-fitting stainless steel magazine is included with each Micro pistol. An extended magazine with 7-round capacity is offered as an accessory.

Weighing less than 14 ounces and with a barrel length of just 2.75-inches, Kimber Micro .380 ACP pistols are easy to carry and conceal.

Slides on the Stainless and CDP models as well as all Micro barrels are machined from stainless steel for superior resistance to moisture. All Micro frames are shaped from the finest aluminum for integrity and strength. In many respects a miniature 1911, among the most important Micro design advantages is a single action trigger with the kind of short, smooth pull that ensures accuracy and builds confidence. The thumb safety, slide release and magazine release are pure 1911 as well. Standard features include a lowered and flared ejection port for flawless ejection and a beveled magazine well for fast, positive loading. Sights are steel - not plastic - and mounted in machined dovetails for additional integrity. Each Micro includes a flush-fitting 6-round magazine and an extended 7-round magazine is available as an accessory.

Ideal for shooters with small hands as well as those who insist on mild recoil combined with enough power for concealed carry or home protection, Micro pistols are the right choice for many applications. Best of all, they offer unequaled Kimber quality, dependability and performance.

Like Micro CDP models, the Micro Carry Stainless .380 ACP has a stainless steel slide and barrel, aluminum frame and smooth single-action trigger. The Micro Carry slide is steel.

MICRO PISTOLS

The Micro Carry .380 ACP is small, light and offers the intuitive operation of a 1911, along with mild recoil.

The Micro family of .380 ACP pistols put power and legendary Kimber dependability in a small 1911-style platform. Mild recoil and simple operation make them an ideal choice for many shooters. Five models are offered, providing a selection of features that meet virtually any need. Collectively, they are the finest .380 ACP pistols anyone can carry.

The Micro Carry has a matte black non-reflective finish to aid concealability. Edges are rounded and blended to avoid snags, and black rubber grips aid control. Like all Micro pistols, it has an aluminum frame and stainless steel barrel. The Micro Carry Stainless goes a step farther, adding a stainless steel slide for additional resistance to moisture and salt. Both CDP and Stainless Raptor models are built to exact specifications with Kimber Custom Shop Features such as night sights, checkering and texturing on the front strap and mainspring housing, stainless steel controls and ambidextrous thumb safety. The Micro CDP (LG) also includes Crimson Trace Lasergrips.

Micro CDP pistols feature steel 3-dot night sights for quick and positive aiming in low light. An ambidextrous thumb safety aids fast operation. Rounded and blended edges will not snag on clothing or holsters.

Micro CDP models have 30 lines-per-inch front strap checkering for a positive grip and enhanced control, even with cold, wet or gloved hands. The high cut under the trigger guard encourages proper grip position for quick sight recovery.

The Micro CDP (LG) features Crimson Trace Lasergrips for fast target acquisition regardless of available light. Custom Shop features include a recessed slide stop pin and tough, non-reflective finish that aids concealment.

Micro Carry
Stainless steel barrel and aluminum frame

Micro Carry Stainless

SOLO PISTOLS

MADE IN AMERICA

Solo pistols combine Kimber quality and 9mm power in a package that weighs just 17 ounces. Borrowing proven 1911 ergonomics, they also have a natural pointability that improves speed and accuracy while making them surprisingly comfortable to shoot. No other micro-compact can match the performance of a Kimber Solo.

The Solo Carry DC (above) and Solo CDP (LG) 9mm pistols take micro-compact power and performance to the extreme.

Solo pistols were designed with many proven 1911 features, including a grip shape that encourages fast target alignment. They are comfortable to shoot as well as easy to control under recoil.

Manual ambidextrous thumb safety, checkered slide release lever and ambidextrous magazine release enable intuitive, fast and safe operation.

Solo pistols have a double action striker-fired trigger with a smooth, consistent pull that breaks clean at 6.5-7.5 pounds. A great trigger pull builds the confidence needed for fast and accurate shooting.

Properly-dimensioned sights are mounted securely in machined dovetails. White dots aid fast alignment - especially in low light. Edges are rounded and blended so they will not snag clothing or holsters.

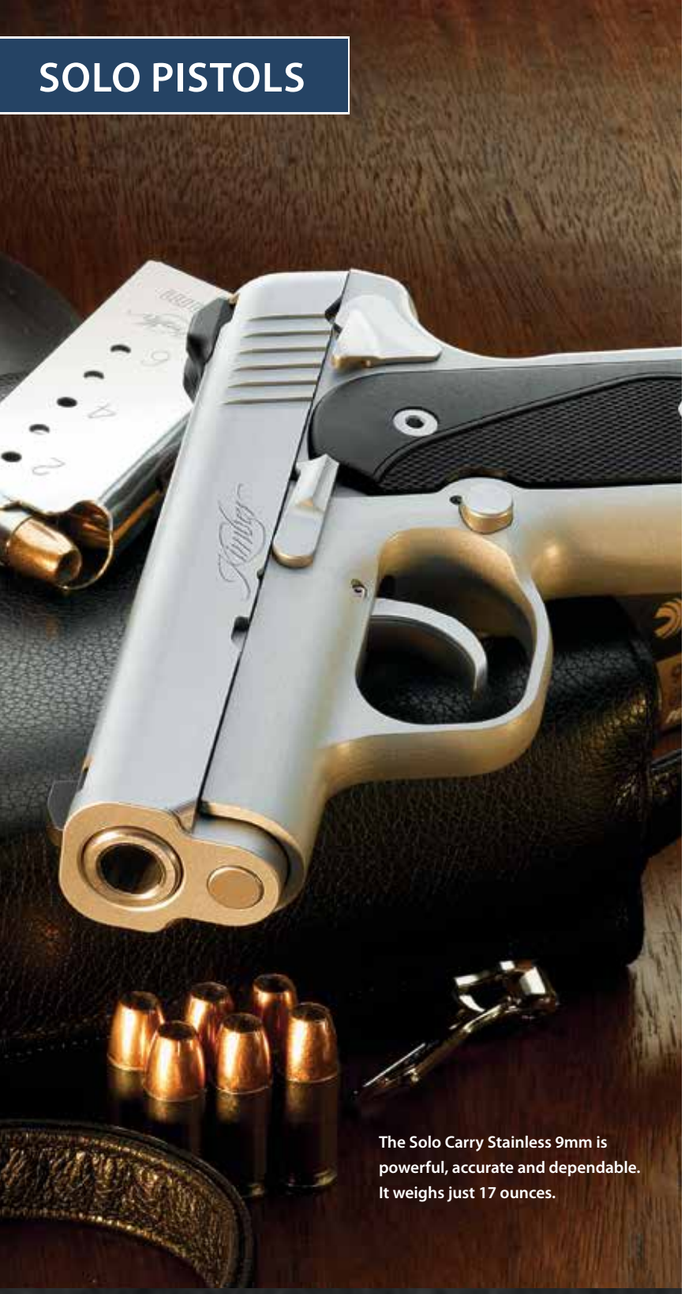
The Kimber legacy of offering today's finest firearms continues with the Solo,® a revolutionary family of pistols that puts 9mm power in a micro-compact platform usually reserved for small calibers. Power aside, 1911 ergonomics ensure that a Solo is easy and comfortable to shoot, regardless of hand size.

With a barrel length of just 2.7 inches, Solo pistols are perfect for backup and concealed carry. Features taken from 1911 pistols also make them exceptionally safe. A manual ambidextrous thumb safety, checkered slide release lever and ambidextrous magazine release button enable fast and intuitive operation. Then there is the double action striker-fired trigger with a smooth, consistent pull that inspires confidence.

All Solo frames are machined from the finest aluminum. Slides and barrels are cut from stainless steel. Edges are rounded and blended so they cannot hang up, slide serrations are deep enough to really work and the 3-dot sights are quick to target. With a design so innovative that several patents are pending, no other micro-compact offers the critical advantages of a Solo. Quite simply, it creates a new standard of performance.

Like other members of the family, the Solo Carry 9mm has a lightweight aluminum frame plus stainless steel slide and barrel.

SOLO PISTOLS



The Solo Carry Stainless 9mm is powerful, accurate and dependable. It weighs just 17 ounces.

The Kimber Solo is the most accurate, shootable and dependable micro-compact pistol available today. Specifically designed to fire high-pressure 9mm defense ammunition, Kimber engineers pushed the limits of physics and geometry to create a ground-breaking platform with unequaled performance. Nine models are offered, each one literally in a class by itself.

Solo Carry DC (Deep Cover) models wear a tough, matte black DLC finish over a stainless steel slide and barrel for extra durability, plus have horizontal serrations on the front strap and backstrap for a more secure grip. Like CDP versions, they have night sights, a Carry Melt treatment for snag-free edges and offer the option of Crimson Trace Lasergrips. Carry models feature 3-dot sights. All Solo pistols have a double action striker-fired trigger system with a consistent and smooth 6.5-7.5 pound pull through the complete path of travel, plus a stainless steel slide and barrel. With a Solo, there is no compromise between size, accuracy and power.

Solo slides lock open on an empty magazine, speeding operation. When a round is in the chamber and light is available, the shell casing should be visible through the Loaded Chamber Indicator Port® at the rear of the barrel hood.

An ambidextrous thumb safety and magazine release button make Solo pistols operational with either hand. Removable grip panels are checkered and beveled for control and comfort. They also provide a positive grip regardless of conditions.

Solo Carry Sapphire features an engraved bright polished blue PVD slide, a ball-milled frame accented with matching bright polished blue parts, Micarta grips, and tritium night sights.

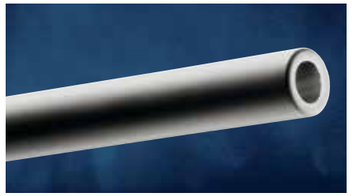
RIFLES

MADE IN AMERICA

Accuracy is the best measure of rifle quality. Reliability follows. Kimber rifles deliver both in a selection of classic sporters, hard-core hunters, unique varminters and no-compromise tacticals. Each is based on an action size designed with minimal dimensions for the cartridges it chambers. No other brand is their equal.

Advanced Tactical SRC (back) and the Model 84M Adirondack are designed for entirely different purposes, yet both are available in .308 Win.



Kimber rifle barrels and chambers are machined to critical match grade dimensions. Rigid quality control ensures exceptional accuracy.

Most models have both pillar and glass bedding for strength and accuracy. All have match grade triggers that break clean at 3-4 pounds.

All rifles have a positive 3-position wing safety with serrated lever, without question the finest system ever designed.

Full-length one-piece Mauser claw extractors lock cartridges to the bolt face for flawless feeding and extraction. This design is superior to common "push feed" actions.

Kimber was founded in 1979 with the singular purpose of building fine rimfire sporting rifles. Success followed and demand drove an expansion into classic centerfires for big game hunting. Today, Kimber rifles are favored by discriminating hunters and shooters, and limited production keeps people standing in line to buy them.

Kimber rifles offer a combination of features that set them apart from other production brands. Barrels, chambers and triggers are crafted with critical match grade dimensions for unequaled accuracy. Pillar and glass bedding add strength and ensure that nothing shifts under recoil or during rough use. Walnut stocks are finished and checkered by hand. Reinforced carbon fiber stocks are the finest worn by any production rifle.

Complete descriptions are presented on the following pages and nearly 2,000 Kimber Master Dealers across America stand ready to assist in the selection of a model that meets any need. Chambered in calibers from .204 Ruger to .458 Lott, one is certain to be ideal for any type of hunting, shooting or tactical law enforcement use. To locate the nearest Kimber Master Dealer, find information on new models or view product videos, please visit Kimber on Facebook or at kimberamerica.com.

The Model 84L Classic Select Grade is offered in .270 Win. and .30-06 Spfd., along with specialized calibers like .280 Ack. Imp. and .25-06 Rem. Weight is approximately 6 pounds, 2 ounces – even with a 24-inch barrel for optimal velocity.

84M Action

84M (Medium) actions have minimal dimensions for cartridges ranging from .204 Ruger to .308 Winchester. The lightest production rifles available today, this action shortens bolt travel for faster operation and gives near-perfect balance for positive aiming. Unlike other rifles that cut weight by reducing barrel length, 84M barrels are the optimal length for the flattest trajectory and superior accuracy. Magazine capacity is 4-6 rounds, depending on the chambering.

84M Features

- Lightest production rifles available today.
- Match grade barrel, chamber and trigger for accuracy.
- Optimal barrel length for highest velocity and flat trajectory.
- Available in 12 models and 9 calibers.

84L Action

84L (Long) actions have the minimal diameter of the 84M but are slightly longer to fit more powerful hunting cartridges such as the .270 Winchester and .30-06 Springfield. Like the 84M, they are the lightest production rifles in their class and have optimal barrel length for the highest velocity and flattest trajectory. They also have the same balance characteristics for fast, consistent aiming. Magazine capacity is 4-5 rounds, depending on the chambering.

84L Features

- Lightest hunting rifles available in these calibers.
- Chambered in America's most popular hunting cartridges.
- Match grade barrel, chamber and trigger for accuracy.
- Available in 5 models and 4 calibers.

8400 WSM Action

8400 actions sized exclusively for WSM (Winchester Short Magnum) cartridges have a greater diameter but remain as short as possible to reduce weight, ensure proper balance and promote fast handling. Barrels are the proper length for maximum velocity and flat trajectory. Ideal for almost any North American big game, 8400 rifles in WSM cartridges offer an unequaled balance of power and light weight. Magazine capacity is 3-5 rounds.

8400 WSM Features

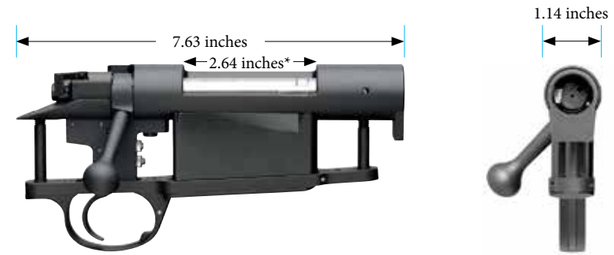
- Unequaled combination of light weight and power.
- Suitable for almost any North American big game.
- Match grade barrel, chamber and trigger for accuracy.
- Available in 7 models and 3 calibers.

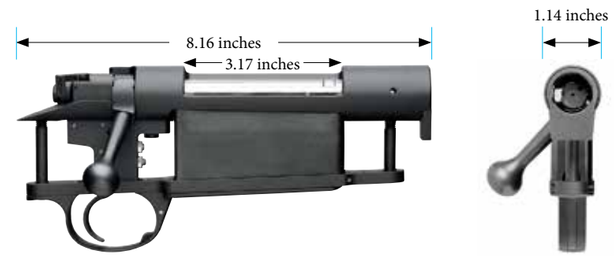
8400 Magnum Action

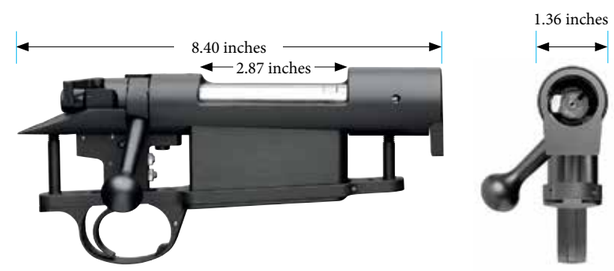
8400 magnum actions have the additional length required by some of the world's most powerful cartridges. From .300 Winchester Magnum to .458 Lott, they are suitable for hunting both large and dangerous game. Here, light weight takes a back seat to performance, although some models are still the lightest in their class. Features common to all Kimber rifles ensure absolute reliability. Magazine capacity is 3-5 rounds, depending on model and caliber.

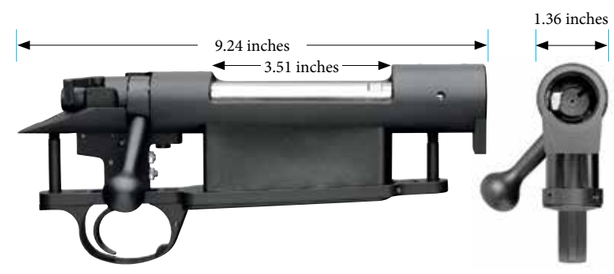
8400 Magnum Features

- Chambered in cartridges for large and dangerous game.
- Barrels have optimal length for velocity and balance.
- Models have unique features for their specific purpose.
- Available in 9 models and 6 calibers.









*This dimension is 2.40 inches in actions chambered for .204 Ruger and .223 Rem.

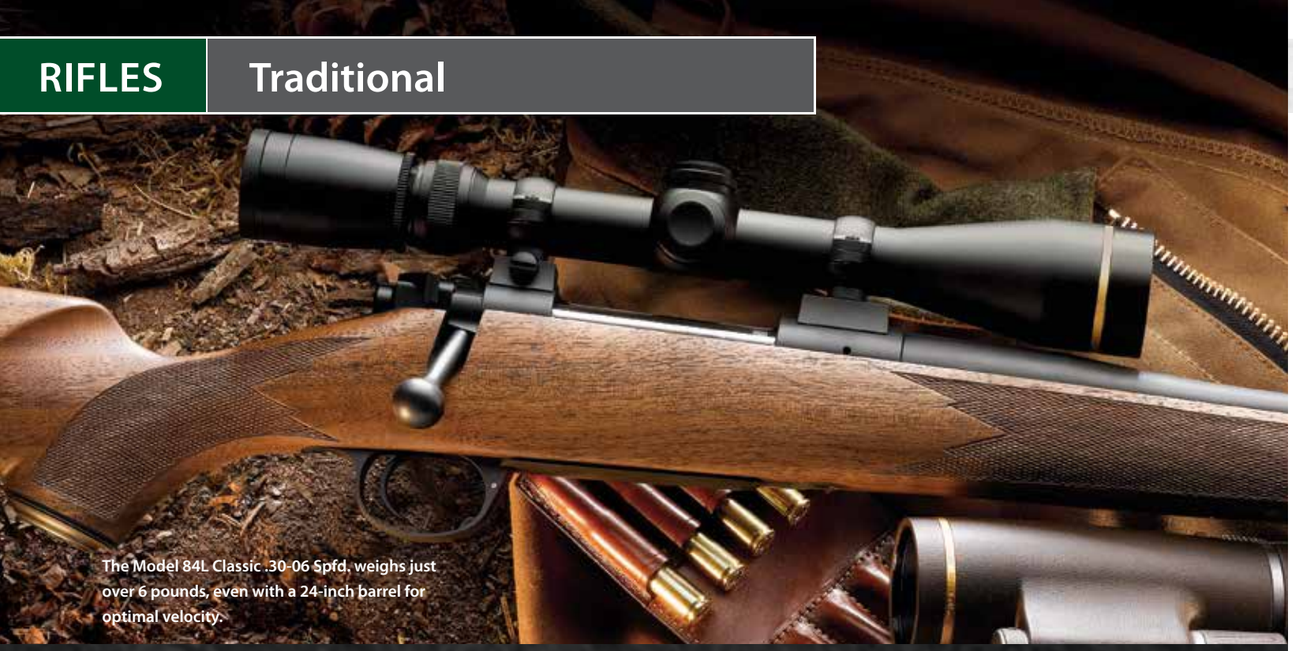
RIFLES | Traditional



The Model 84L Classic .30-06 Spfd. weighs just over 6 pounds, even with a 24-inch barrel for optimal velocity.

Kimber's traditional big game rifles offer an unequaled combination of features, elegance and performance. All actions have minimal dimensions for the cartridges they chamber, permitting a trim overall profile that reduces weight by as much as 2 pounds. Stocks are born of fine walnut, then checkered and finished by hand. No other brand can compare.

All traditional rifles include critical design features that ensure performance and dependability. Barrels, chambers and triggers are machined to match grade dimensions for accuracy. A full-length Mauser claw extractor provides flawless controlled round feeding and extraction. The 3-position Model 70-type wing safety is positive, silent and fast. Then there is the elegant sporter stock – carefully shaped and dimensioned from fine walnut for both recoil control and quick pointability. Chambered in a wide selection of calibers, finding an ideal combination for big game from Alaska to Africa is virtually assured. Just as hunting is more than a sport, a Kimber traditional is more than a rifle. Take one along on your next hunt.

Kimber actions have minimal dimensions for the cartridges they chamber. This allows a trim profile that reduces weight as much as 2 pounds compared to other brands and also gives them near-perfect balance for fast handling.

All Kimber rifles in big game calibers have both pillar and glass bedding for strength and accuracy. Sculpted steel bottom metal has a floorplate release inside the trigger bow that prevents accidental opening.

A properly dimensioned classic stock and recoil-absorbing 1-inch Pachmayr Decelerator recoil pad diminish felt recoil. Straight comb stocks slide back into the shoulder, not up and into the cheekbone.

Classic
A-grade walnut, 20 LPI panel checkering, matte finish

Classic Select Grade
Features of the Classic plus French walnut, ebony forend tip

SuperAmerica
AAA-grade walnut, ebony, 24 LPI wrap checkering, cheekpiece, polished blue

RIFLES | Mountain

With the 84M Mountain Accent starting at 4 lbs 13 oz, Kimber Mountain rifles are the ultimate tool for any hunter.

A true mountain rifle must be light and accurate. Hardcore hunters understand. Montana, Adirondack and Mountain Ascent models are the lightest production big game rifles ever offered, delivering legendary Kimber accuracy yet weighing as little as 4 pounds, 13 ounces. Stocks are reinforced carbon fiber for strength and stainless steel shrugs the elements. These rifles have no equal.

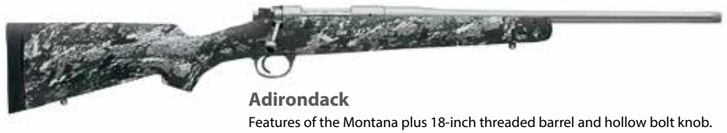
Montana rifles combine all the best Kimber features in a lightweight, stainless steel and reinforced carbon fiber package that guarantees performance. Actions offer controlled round feeding plus a 3-position wing safety and are bedded on pillars and at the recoil lug for strength. Match grade barrels, chambers and triggers ensure accuracy. Adirondack and Mountain Ascent models go even farther. With an 18-inch barrel, spiral fluted bolt body and hollow bolt knob, the Adirondack is compact and fast. The Mountain Ascent has additional custom features, including a fluted barrel and muzzle brake. Both wear Gore Optifade stock treatments so they blend into almost any environment. No other brand offers the advantages of a Kimber mountain rifle. Not even close.

Mountain Ascent rifles incorporate a muzzle brake to reduce felt recoil and include a thread protector so the brake may be removed for hunting. Matte black ring mounts are included and Optifade versions are available separately.

Montana models are among the lightest hunting rifles available today. Those chambered for WSM and belted magnums scale well under 7 pounds. Adirondack and Mountain Ascent rifles in .308 Win. weigh just 4 pounds, 13 ounces.

Mountain Ascent models incorporate custom touches like a fluted bolt handle, hollow bolt knob and fluted bolt body. Premium reinforced carbon fiber stocks with both pillar and glass bedding lock in accuracy.

Montana
Reinforced carbon fiber stock, stainless steel barreled action.



Adirondack
Features of the Montana plus 18-inch threaded barrel and hollow bolt knob.

Mountain Ascent
Features of the Montana plus muzzle brake and fluting treatments.

Features

- Kimber mountain rifles all have a premium hand-molded reinforced carbon fiber stock.
- Adirondack stocks have a Gore Optifade Forest finish. Mountain Ascent stocks have a Gore Optifade Open Country finish.
- All models have a stainless steel barreled action.
- Adirondack rifles have an 18-inch barrel threaded for a muzzle brake that is available as an accessory.
- Mountain Ascent rifles have a fluted barrel and bolt, plus a muzzle brake with a thread protector cap for optional use while hunting.

RIFLES | Dangerous Game

Chambered in .375 H&H Mag., .416 Rem. Mag. and .458 Lott, the Model 8400 Caprivi is without peer as a dangerous game rifle.

Kimber dangerous game rifles deliver unwavering dependability and charge-stopping energy. Equally important, they have critical features absent from other production rifles in heavy calibers. The Caprivi is designed for Africa and the Talkeetna is ready for the unpredictable weather of Alaska – places where Kimber quality takes on a whole new level of importance.

The Model 8400 Caprivi is stocked in AA-grade French walnut with a hand-rubbed oil finish, 24 lines-per-inch wrap-around checkering, ebony forend tip and traditional pancake cheekpiece. The Caprivi Special Edition raises the bar with AAA-French walnut and a bone charcoal color case hardened receiver from Turnbull Restoration. The Talkeetna has a stainless steel barreled action and a reinforced carbon fiber stock. They all have a full-length Mauser claw extractor for true controlled-round feeding and extraction, plus a 3-position safety that is positive, quiet and fast. These are the finest production dangerous game rifles ever offered, and the game they were designed to hunt deserves nothing less.

The Caprivi has a 3-leaf island express sight with the fixed leaf regulated for 50 yards. Both folders remain green for custom regulation. Front sights on Caprivi and Talkeetna models are hooded and adjustable for elevation.

Kimber dangerous game rifles are bedded on aluminum pillars and also at the recoil lug for superior strength and accuracy. Caprivi models have twin crossbolts for additional integrity.

Caprivi and Talkeetna models have a barrel band sling swivel stud. The Talkeetna has a single-leaf express sight and a reinforced carbon fiber stock, the finest of its kind ever offered on a production rifle.

Caprivi
AA-grade French walnut, pancake cheekpiece, 3-leaf express sight

Talkeetna
Reinforced carbon fiber stock, stainless steel barreled action, single-leaf sight

Features

- Caprivi stocks have both pillar and glass bedding, plus twin crossbolts for additional strength.
- Caprivi models have sculpted steel bottom metal with floorplate release inside the trigger guard to prevent unintentional opening.
- Caprivi rifles have 3-leaf (1 fixed and 2 folding) express sights. The Talkeetna rear sight has a single fixed blade.
- Caprivi and Talkeetna rifles both have a barrel-mounted sling swivel stud that cannot contact the forward hand during recoil.

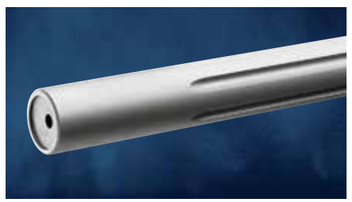
The Model 84M Pro Varmint .22-250 Rem. has a laminated stock and stainless steel barreled action.

Varmint rifles must deliver pinpoint accuracy with absolute consistency regardless of field conditions. Kimber varmint rifles ensure this level of performance through a combination of match grade components, careful bedding and proper design. Five specialized models cover it all, from predator calling to working from a stand.

Light to heavy, there is a Kimber varmint rifle for any type of predator hunting or varmint shooting. Varmint, LongMaster Classic and Pro Varmint models are perfect for hunters who move and call. SVT (Short Varmint/Target) and LongMaster VT (Varmint/Target) are best suited for a day overlooking a prairie dog town. All have match grade stainless steel fluted barrels with match grade chambers. Based on the Model 84M action with minimal dimensions for the cartridges it chambers, they also feature a full-length Mauser claw extractor for true controlled-round feeding and extraction, along with a match grade trigger that breaks at 3-3.5 pounds.

Varmint rifles are based on the Kimber Model 84M™ action with minimal dimensions for the cartridges it chambers. This reduces overall weight, even with a heavier barrel contour that enhances accuracy.



Match grade stainless steel barrels with match grade chambers ensure the highest degree of accuracy. Barrels are fluted to reduce weight, improve balance and speed cooling.

Model 84M rifles in SVT and LongMaster VT configurations have heavy target stocks shaped from ultra-stable laminated wood blanks. The high comb and deep pistol grip with palm swell are ideal for shooting prone or from a bench.

Varmint & LongMaster Classic
A-grade walnut sporter stock, stainless steel fluted barrel

Pro Varmint
Laminated stock, beavertail forend, stainless steel barreled action

SVT
Laminated high comb target stock, 18.25-inch stainless steel bull barrel

LongMaster VT
Features of SVT plus 26-inch stainless steel bull barrel

Features

- All varmint rifles are based on the Model 84M action designed with minimal dimensions to reduce weight.
- Varmint rifles feature match grade stainless steel barrels with match grade chambers to ensure accuracy.
- Fluted barrels reduce weight, improve balance and speed cooling.
- All varmint models have pillar bedding. Varmint, LongMaster Classic and Pro Varmint versions also have glass bedding.
- Sculpted steel bottom metal with floorplate release inside the trigger guard is both functional and elegant.

RIFLES | Tactical

The new Model 8400 Patrol Tactical features a Manners MCS-T6 stock. It is available in .308 Win. and .300 Win. Mag.

Kimber builds five no-compromise tactical rifles to meet the requirements of military or law enforcement professionals. In these arenas, the need for accuracy and dependability takes on new meaning. From a short, light configuration for fast deployment to three new heavier models with advanced features for long-range precision, Kimber tactical rifles are ready for anything.

Kimber tactical rifles have match grade barrels, chambers and triggers for the highest degree of accuracy. Actions feature a full-length Mauser claw extractor for the unequaled dependability of controlled-round feeding, plus an extended bolt handle with an oversized bolt knob for positive operation regardless of field conditions. The Model 84M LPT is a light urban tactical rifle offering the advantage of short-barreled portability. The Patrol Tactical is a tough, full-size model with a reinforced carbon fiber stock configured for optimum stability from any position. Advanced Tactical models are built by hand and guaranteed to have fired a 3-shot group measuring .5 MOA prior to shipping. They both have folding stocks and accept detachable box magazines.

Advanced Tactical models accept detachable box magazines with either 5- or 10-round capacity. All tactical rifles have extended bolt handles with large knobs for positive operation with gloved hands.

Advanced Tactical models feature threaded barrels fitted with a SureFire muzzle brake/suppressor adapter. Advanced Tactical barrels also have their match grade dimensions verified with an air gauge to ensure accuracy.

The Advanced Tactical SOC folding stock is machined from aluminum. It has an integral rear monopod, two 1913 MIL-SPEC rails on the forearm, adjustable comb and a forend rail for mounting a bipod.

LPT
Model 84M action, 22-inch fluted barrel, laminated stock

Patrol Tactical
Fluted barrel, grooved forearm and squared forend

Advanced Tactical II
Stainless steel barrel with SureFire muzzle brake/suppressor adapter

Advanced Tactical SOC
Adjustable aluminum folding stock, SureFire muzzle brake/suppressor adapter

Advanced Tactical SRC
Adjustable aluminum folding stock, SureFire muzzle brake/suppressor adapter black finish, 16-inch barrel

Features

- The LPT has a tough, laminated stock with a beavertail forend.
- The Patrol Tactical has a Manners MCS-T6 reinforced carbon fiber stock. The extended vertical pistol grip has ambidextrous palm swells.
- The Advanced Tactical II has a Manners MCS-TF4 folding stock with adjustable comb and accepts detachable box magazines.
- The Advanced Tactical SOC and SRC have an adjustable aluminum folding stock with two forend rails. It accepts detachable 5- and 10-round magazines.

1911 pistol specifications continue on the following pages...

1. The Warrior SOC features a tan (slide) and green (frame) KimPro II finish, Crimson Trace Rail Master laser sight, lanyard ring and special grips with an aggressive texture.
2. Team Match II pistols have red/blue G-10 grips and wear a 24K gold U.S.A. Shooting Team logo on the slide.
3. Crimson Carry models with Crimson Trace Lasergrips that project a green beam are also available.
4. Warrior models, along with the Pro Covert II and Custom Covert II, have a lanyard ring.
5. The Ultra RCP II has a bobbed grip safety and thumb safety, smooth magazine release button and trough sight – all for greater concealability and snag-free draw from concealed carry.
6. Gold Combat models and the Classic Carry Pro have scalloped French shoulders that elegantly blend the slide to the frame.

*Barrel material for 1911 pistols available in California may be carbon steel rather than stainless steel where indicated.

7. Master Carry models have Crimson Trace Master Series Lasergrips.
8. All Crimson Carry, Master Carry, Super Carry and Micro models, along with the Classic Carry Pro, have a recessed slide stop pin.
9. Solo Carry and Solo Carry Stainless models have white dot sights and smooth/checkered grips.
10. The Solo CDP (LG) has 30 lines-per-inch checkering on the backstrap.
11. The Solo Carry DC has a tough, black DLC finish on the slide and barrel, along with serrations on the front strap and backstrap.
12. TFS models are threaded for suppression and include a removable thread protector cap.
13. The Warrior® II is approved for sale in California and also available in other states. Similar to the Warrior, it has a carbon steel barrel and the Kimber Series II Safety.™
14. Non-Lasergrip equipped Eclipse models in all sizes/calibers are sold in California.

*Barrel material for 1911 pistols available in California may be carbon steel rather than stainless steel where indicated.

1. The Warrior SOC features a tan (slide) and green (frame) KimPro II finish, Crimson Trace Rail Master laser sight, lanyard ring and special grips with an aggressive texture.
2. Team Match II pistols have red/blue G-10 grips and wear a 24K gold U.S.A. Shooting Team logo on the slide.
3. Crimson Carry models with Crimson Trace Lasergrips that project a green beam are also available.
4. Warrior models, along with the Pro Covert II and Custom Covert II, have a lanyard ring.
5. The Ultra RCP II has a bobbed grip safety and thumb safety, smooth magazine release button and trough sight – all for greater concealability and snag-free draw from concealed carry.
6. Gold Combat models and the Classic Carry Pro have scalloped French shoulders that elegantly blend the slide to the frame.
7. Master Carry models have Crimson Trace Master Series Lasergrips.
8. All Crimson Carry, Master Carry, Super Carry and Micro models, along with the Classic Carry Pro, have a recessed slide stop pin.
9. Solo models with white dot sights.
10. The Solo CDP (LG) has 30 lines-per-inch checkering on the backstrap.
11. The Solo Carry DC has a tough, black DLC finish on the slide and barrel, along with serrations on the front strap and backstrap.

1. Weight can vary as much as 8 ounces due to natural walnut density.
2. Barrel length indicated on Mountain Ascent rifles does not include muzzle brake.
3. Barrel length on Advanced Tactical II, Advanced Tactical SOC and Advanced Tactical SRC rifles includes Surefire muzzle brake/suppressor adapter.
4. Advanced Tactical II, Advanced Tactical SOC and Advanced Tactical SRC rifles are shipped with one (1) 5-round detachable magazine. Additional 5- and 10-round magazines are available as an accessory.
5. The Adirondack has a threaded barrel and ships with a thread protector cap, but does not include a muzzle brake (which is available as an accessory). Also has a hollowed bolt knob.

Technology, ergonomics and unequaled performance make PepperBlaster and PepperBlaster II the most effective less-lethal protection available today. Don't spray... shoot. PepperBlaster isn't spray; it is better.

Oleoresin Capsicum (OC) is the most effective inflammatory agent available. Effects are immediate and last up to 60 minutes.

PepperBlaster and PepperBlaster II use patented Jet Protector Technology to propel 2 separate blasts of potent OC at 112 MPH.

PepperBlaster and PepperBlaster II have an effective range of up to 13 feet; stopping threats at a distance.

The non-aerosol pyrotechnic drive system is not affected by cold or heat, and blasts straight through wind and rain.

Revolutionary Pyrotechnic Delivery System

After proving to be a tremendously effective tool in the hands of law enforcement professionals, hundreds of defensive pepper spray products have been introduced. The common problem is that they are dispensed in old-fashioned spray canisters. Temperature-sensitive and difficult to aim, the slightest breeze can blow these irritating sprays back into the user's face and make a bad situation worse. To overcome this problem, Swiss engineers perfected a cutting-edge delivery technology that takes the potential of OC to a higher level. PepperBlaster® and PepperBlaster® II use a revolutionary non-aerosol pyrotechnic delivery system capable of accurate placement and with enough force to wrap around glasses or penetrate a face mask. A superior ingredient formulation combines a powerful solution of 10% OC (2.4% capsaicinoid content) with benzyl alcohol for increased viscosity. Delivery speed keeps each blast on target, reducing the risk of blowback, drift or a miss. Unlike conventional sprays, they do not lose pressure over time. In the world of less-lethal protection there is simply no more effective pepper device than a PepperBlaster or PepperBlaster II.

To learn more about PepperBlaster and Pepper Blaster II, download a free QR Code reader app on your smart phone and scan this code.

Stop Threats At A Distance

PepperBlaster and PepperBlaster II are today's most consistently effective less-lethal delivery systems. More powerful than conventional canisters, the pyrotechnic delivery system shoots a concentrated jet of OC solution at 112 MPH, far too fast for an assailant to avoid. An intuitive and ergonomic design promotes speed and accuracy. An orange PepperBlaster II training unit that fires blue dye is also available.

PepperBlaster and PepperBlaster II weigh about 4 ounces and are the size of most cell phones. They are easy to carry and conceal, so they will not be left at home or in the car like bulky cans. The PepperBlaster II has a pistol grip that ensures control and a sight system that aids accuracy. Both versions offer simple and ambidextrous operation. Aiming is as easy as pointing a finger and a reserve blast is immediately available if needed. Effective, reliable and affordable, PepperBlaster and PepperBlaster II are the best less-lethal options for stopping threats at a distance.

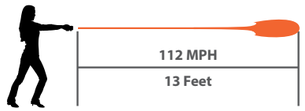
PEPPERBLASTER® & PEPPERBLASTER® II	
Dimensions (inches)	PB L: 4.3, W: 0.9, H: 2.7 PBII L: 4.7, W: 1.0, H: 3.3
Weight (charged)	4.2 ounces (120 grams)
Effective range	2-13 feet
Operation	Double action with automatic switchover
Content	Liquid irritant, 2 charges per unit
Irritant agent	10% OC (oleoresin capsicum); 2.4% capsaicinoids
Charge volume	0.21 fluid ounces (6 ml)
Charge velocity	112 MPH/164 FPS
Operating temperature	-4 °F (-20 °C) to 176 °F (+80 °C)
Trigger pull weight	6.6 pounds (3 kg)
Drop safety	Drop tested to 5 feet (1.5 meters)
Water resistant	Yes
Accessories	PB Black Cordura carry pouch PBII Black Cordura carry pouch, belt clip
Available colors	PB Black PBII Red, gray
Shelf life	4 years
Training unit (sold seperately)	PB N/A PBII Orange housing, contains inert blue dye
Package contents	PB or PBII, storage tin, owner's manual
Additional features	PB Streamlined body, integral belt clip PBII Pistol grip, open sights

Caution: Strong irritant. Keep out of reach of children. May be unlawful to own or posses in some states or jurisdictions. Use for any purpose other than lawful self defense may be punishable by imprisonment, fines or both. Guardian Angel protected by U.S. Pat. 6,951,070B2.

Available in red or gray, PepperBlaster II is fired by pressing a trigger mechanism. A pistol grip with finger groove ensures control and a sight system aids accuracy. Item #LA98001, #LA98002

PepperBlaster is a streamlined version of the PepperBlaster II and has an integral belt clip. Both have a swing-away trigger guard that protects against unintentional discharge. Item #LA95001

The PepperBlaster® II Trainer is an inert 2-shot training device that discharges a blue food grade dye for target practice. Item #LA98010



PepperBlaster and PepperBlaster II are economical and disposable after use. Solution travels up to 13 feet in a fraction of a second, far too fast for an assailant to avoid.

A belt clip with thumb break fits PepperBlaster II. A black Cordura pouch fits both versions. Both items are offered as accessories. Item #LA98041, #LA98040

MADE IN AMERICA

1911 Magazines

Kimber 1911 magazines are available in an assortment of finishes, sizes and calibers. They fit Kimber pistols, plus almost any brand and model of Mil-Spec 1911. The KimPro® Tac-Mag® (center, with extra bumper pads) is the finest 1911 .45 ACP magazine available today. Both 7- and 8-round versions are offered, and a compact 7-round model fits pistols with short grips. Each has a quick-change system that permits immediate attachment of three included bases, along with large round count holes that read at a glance.

Solo & Micro Magazines

Two sizes of Solo 9mm and Micro .380 ACP magazines are available. Standard 6-round magazines fit flush, while extended 8-round (Solo) and 7-round (Micro) versions offer a longer gripping surface.

Grips

Kimber offers a full selection of premium grips and Crimson Trace Lasergrips that fit almost any brand of 1911 pistol, regardless of caliber. Many feature hand-cut checkering and hand finishing. Crimson Trace Lasergrips in rosewood finish are also available for Solo and Micro pistols. Premium hex head grip screw sets are offered separately and add a finishing touch.

Kimber Custom Shop

The Kimber Custom Shop™ can quickly and professionally modify or personalize any Kimber pistol. Services include installation of night sights, custom finishes, part replacement, checkering, melts, custom parts and tuning.

Leather

An assortment of fine leather holsters and magazine carriers with the Kimber logo are available for Kimber 1911, Solo and Micro pistols. Kimber holsters also fit most other brands of Mil-Spec 1911 pistols.

Rifle Accessories

A selection of mounting systems for any application, along with extended bolt handles, leather logo sling and other items is continuously expanding.

Gear

Kimber offers a wide variety of logo apparel and gear, and the selection is always growing. Visit store.kimberamerica.com for a complete presentation.

Rimfire Conversion Kits

Kimber Rimfire Target Conversion Kits (left) fit Kimber and most other Mil-Spec 1911 pistols with 4- or 5-inch barrels. Rimfire Compact conversions fit Kimber and most other Mil-Spec 1911 pistols with a 3- or 4-inch barrel. Installation takes 1 minute and does not require tools. See page 42 for more information.

Kimber® pistols and rifles are shipped with a California-approved cable lock as a safety measure. Additionally, 1911 pistols are shipped in a lockable high-impact case, and both Micro and Solo® pistols are shipped in a lockable soft case. Use of the cable lock is encouraged at all times when a firearm is in storage. Kimber owners may request a free cable lock by mail. Include $10 for postage and handling, and mail the request to:

Kimber Service
30 Lower Valley Road
Kalispell, MT 59901

Kimber firearms and Less-Lethal products should only be purchased and used in complete compliance with all laws; national, state and local. All suggestions for use in this catalog, or in any Kimber literature, must be taken within the context of these laws. Customers and dealers are required to comply with all applicable laws.

All Kimber centerfire 1911 and Solo pistols now include the Loaded Chamber Indicator Port® feature. When a round is in the chamber and light is available, the brass or silver color of the shell casing should be visible through the port in the barrel hood. This feature is another example of Kimber's commitment to firearm safety. However, one must never assume a firearm is unloaded until both the chamber and magazine are empty and the magazine is removed. Even then, all established rules of firearm safety must always be followed. Micro pistols do not have the Loaded Chamber Indicator Port feature.

Firearm safety is every gun owner's responsibility. Use and store all firearms safely. Teach everyone in your home, especially children, proper firearm safety.

Kimber Less-Lethal products contain a strong irritant (inflammatory agent) derived from cayenne peppers. Avoid contact with skin and eyes. In case of contact, flush with water for at least 15 minutes. Seek immediate medical attention if symptoms persist or worsen. Always keep Kimber Less-Lethal products out of the reach of children. There is risk of injury to eyes if used at less than the minimum safe distances specified in the product instruction manual. Kimber Less-Lethal products may be unlawful to own or possess in some states and jurisdictions. Check with your state and local authorities. Use of Kimber Less-Lethal products for any purpose except lawful self defense may be a crime. U.S. PAT. 6,951,070B2.
